1) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michele Tyrpak on 11/21/2005.

The application has been amended as follows:

Non-elected claims 13-17 are cancelled.

2) The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the cited prior art does not disclose a roll structure having a fiber-containing roll cover over a mandrel, said roll structure includes an end plate, a compression element, a shaft, and an elongated compression means exerting pressure against a compression element that has an indentation in a face opposite the face pressed against the end plate and the elongated compression means engages said compression element in said indentation (claims 4-7). Claim 5 elaborates that the compression element is a pin and the indentation is a slot in said pin. Claim 6 elaborates that the indentation is a socket and the compression means has a ball engaging said socket. Claim 7 elaborates that the compression element is a pin positioned within a slot of the roller end assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
